Re: Weather update

Good afternoon, Bulkley Valley Lakes will be receiving 10-20cm of snow over the next couple of days. Other areas could see higher amounts of accumulation.

- Use caution for any travel and drive to the conditions
- Always drive with your headlights and taillights on
- Check drive BC before you travel

Our crews and equipment are ready and available to maintain the Highways and roads during this event. We appreciate your patience with our slow-moving vehicles and hope that all trips are planned accordingly.
